

# Acting as some kind of Authentication (Fu- Logic Edition)

Aaron Bedra  
Raleigh.rb  
February 17, 2009

# Authentication

# Authorization

# Any Questions?

Small, single  
application

# Restful Authentication

# Authlogic

# Clearance

(COURTESY BRICKARTIST.COM)

# Built in

# Easy to install

# Built in generators

# Generated Tests\*

# Non-transferable

Great for single apps  
that aren't that big.

Many applications,  
different  
authentication  
providers

**WTF?**

# Central Authentication Service

# Rubycas Server

# Castronaut

External

Applications can be  
deployed with  
multiple auth sources

# Single sign on

# Easily shared across applications

# More setup

# More moving parts

# Harder to test

# Harder to deploy

# Service based endpoints

# O-Auth

# Web services

# Valet key

# FAIL!

# oauth.net

`code.google.com/p/  
oauth-plugin/`

You control your  
destiny

You control the  
amount of access

In use by Google,  
Yahoo and even  
Twitter!

# Fairly new

# Lessons

# Don't roll your own!

B O B M A R L E Y

Don't roll your own!

# Split admin concerns

# TEST!

When in doubt ask  
for help
